Listing of Claims:

- 1. (currently amended) A process enabling a digital image (22) to be displayed on a terminal (1) equipped with a keyboard (3) and a display screen (2), the process being characterized by the following comprising the steps of:
 - a) eompose, composing from the keyboard (3) of the terminal(1), an electronic message including at least one identifier of a photographic support (10) comprising thumbnails (11);

15

- b) send, sending from the terminal (1), the electronic message composed in said step a) to a messaging server (16), said messaging server (16) being identified by a unique telephone number;
- c) automatically transmit transmitting said electronic message to a processing server (5);

20

d) automatically process processing, from the processing server (5), the electronic message sent, in order to select a set of digital images corresponding to the thumbnails (11) of the identified photographic support (10) and included in the electronic message;

25

- e) automatically transmit transmitting to the terminal (1) a notification of the availability of the set of selected digital images;
- f) automatically <u>display displaying</u> on the screen (2) of the terminal (1) the notification of the availability of the selected digital images;
- g) validate validating, from the terminal (1), a display request for the available digital images;

30

- h) automatically transmit transmitting the available digital images to the terminal (1); and
- i) automatically <u>display displaying</u> said digital images (22) on the screen (2) of the terminal (1).

- 2. (currently amended) The process according to claim 1, characterized in that wherein, during said step b) of claim 1, an automatic invoicing is further carried out, the value of the invoiced sum being a function of the a content of the electronic message composed at said step a) of said claim 1.
- 3. (currently amended) The process of as in any one of the claims 1 or 2, eharacterized in that wherein the display request eonsists in comprises activating, from the keyboard (3) of the terminal (1), a universal resource location (URL) mentioned in the notification of availability.
- 4. (currently amended) The process as in any one of the claims 1 to 3, eharacterized in that, wherein from the display on the screen (2) of all the identifiers (12) specific to the thumbnails (11) of a photographic support (10), it enables the selection of at least one identifier (12) of said set, and in that it enables the validation of the identifier selection performed, so as to display on the screen (2) of the terminal, the digital image (22) corresponding to the selected identifier (12).
- 5. (currently amended) The process as in any one of the claims 1 to 4, characterized in <u>such</u> that in the ease of the transmission of a plurality of digital images (22) to the terminal (1), said digital images (22) are automatically displayed successively in a display sequence whose frequency can be programmed.

15

- 6. (currently amended) The process as in any one of the claims 1 to 4, characterized in such that in the case of the transmission of a plurality of digital images (22) to the terminal (1), said digital images (22) are displayed successively according to a request manually performed from the keyboard (3) of the terminal (1).
- 7. (currently amended) The process as in any one of the claims 1 to

6, characterized in that wherein the photographic support (10) comprises an identifier located in a zone (14) of said photographic support (10).

- 8. (currently amended) The process as in any one of the claims-1 to 7,
 5 characterized in that wherein the photographic support (10) is a photographic index comprised of photographic paper.
- 9. (currently amended) The process as in any one of the claims 1 to 7,
 characterized in that wherein the photographic support (10) is a
 photographic film strip.
 - 10. (currently amended) The process according to of claim 1, characterized in that wherein the identifier of the photographic support (10) is placed on a material support distinct from said photographic support (10).
 - 11. (currently amended) The process as in any one of the claims-1 to-10, eharacterized in that wherein the terminal (1) is a portable terminal.

15

12. (currently amended) The process according to of claim 11, characterized in that wherein the portable terminal (1) is a cell phone.
